

**UNIVERSITY SCHOLAR PROGRAM
FACULTY EVALUATION ONE**

From the faculty member most closely supervising the student's project, serving as chair (advisor one) of the student's advisory committee

This evaluation form is available through UConn's Quest portal at <http://quest.uconn.edu>. Once the student has designated the chair of their committee (advisor one) in their Quest portal application, the faculty member can log in with their NetID and password and access the recommendation form. It will include the following questions:

- Please evaluate the student's ability to engage with complex questions or challenges in their areas of interest.
- Please evaluate the student's ability to engage with multiple fields of study, methodologies, and/or points of view.
- Please evaluate the student's readiness to take initiative, take intellectual and/or creative risks, and respond to setbacks.
- Please evaluate the student's qualifications to complete this project. For example: the student's awareness of the relevant literature and the student's understanding of the steps necessary to complete the project.
- What makes this project extraordinary for an undergraduate student?
- Please evaluate the feasibility of this project. Please consider the availability of resources (e.g. access to a laboratory, organization, or funding), your availability, and the time frame in which the student intends to complete the project.
- Does this project require human/animal subjects, recombinant DNA, biohazards, or stem cell review? If yes:
 1. Will the student need to submit a proposal for review or will the student be added to an existing protocol?
 2. Will the student be able to complete the project within the time frame outlined?
- Will a major portion of this project be supervised by a non-UConn faculty member or researcher? If so, have you been in communication with them?

Note: The response boxes provided in the online application are unlimited in size.
